

"We prefer environment-friendly services because we care for you"

Tectzo Solutions Private Limited

Engineered For Safety

Our MNC Partners

BOLT TAS

About Us

A Startup that has a track record of success in the field of renewable energy research, with a particular emphasis on the design of converters and inverters for the green energy revolution, along with a strong technical team in Electrical and Electronics Engineering, is readily supplying the technological solutions to societal needs.

Our Vision

To illuminate the future with cutting-edge solar and power electronics solutions, our vision is to redefine energy possibilities, fostering a world where sustainability meets innovation.

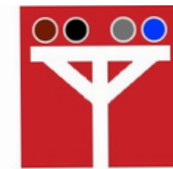

Our Mission

To deliver impactful solutions to technical challenges through innovative technology, ensuring customer satisfaction and providing exceptional value for money.

A R&D based Green Energy Solution Provider

We work closely with our clients to understand their unique needs and develop customized renewable energy solutions that meet their specific requirements. Our solutions are designed to help our clients reduce their reliance on fossil fuels, lower their energy costs, and improve their overall energy efficiency.

Tectzo
SOLUTIONS PRIVATE LIMITED

A Technological Solution Providing Company

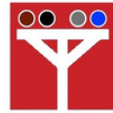

Supported by

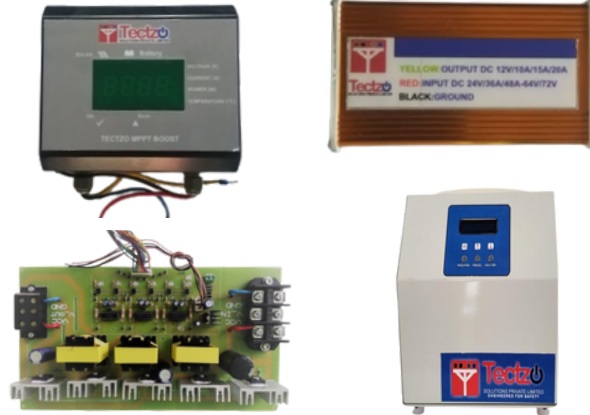

www.tectzo.com

What We Provide?

- ✔ **On Grid/ Off Grid Solar Solutions**
Solar EPC, I&C - Ground Mount & Rooftop- C&I
- ✔ **Group Captive** - Private Power Generation with Standard PPA
- ✔ **BESS** - Battery Energy Storage Systems
- ✔ **Solar/Wind/ Biogas** Energy based innovative Products
- ✔ **Power Electronics R&D** - Customized Inverters and Converters
- ✔ **Electronics** - Innovative Product Development
- ✔ **IoT and Web/Mobile App** based solutions

Our Electrical Products

Specialized AC & DC Converters (Boost/Buck), Regulators, EV Chargers

Our Other Societal Products

Smart Thermal Sanitizer

Bio Sim- IV Monitoring System

Group Captive (Open Access)

Our Services

Renewable Energy Solutions

Solar/Wind/Biogas new power plant
Entire Procurement and Construction,
Operation and Maintenance

Private Power Sales (Solar)

Renewable Energy based Private Power
sales to Commercial and Industries with
20-25 years Power Purchase Agreement

New Product Development

Innovative Idea/Prototype to Product
development support in the domain of
Electrical/Electronics & Automation

IoT/App based Automation

Internet of Things based factory
automation solution and entire Power
Plant Data Logging and Control using
Web/Mobile application

Special Machines

Customer requirement based advanced
Solar Powered Special Purpose
Machines supply
